C:\Users\jelpa>flutter

Manage your Flutter app development.

Common commands:

  flutter create <output directory>
    Create a new Flutter project in the specified directory.

  flutter run [options]
    Run your Flutter application on an attached device or in an emulator.

Usage: flutter <command> [arguments]

Global options:
  -h, --help            Print this usage information.
  -v, --verbose          Verbose logging, including all shell commands executed.
                        If used with "--help", shows hidden options. If used with "flutter doctor", shows additional diagnostic information.
  --no-version-check    (Use "--no" to force verbose logging in those cases.)
                        target device id or name (prefixed allowed).
  --version             Reports the version of this tool.
  --suppress-analytics  Suppress analytics reporting when this command runs.

Available commands:

Flutter SDK
  bash-completion      Output command line shell completion setup scripts.
  channel              List or switch Flutter channels.
  config               Configure Flutter settings.
  doctor              Show information about the installed tooling.
  downgrade            Downgrade Flutter to the last active version for the current channel.
  precache             Populate the Flutter tool's cache of binary artifacts.
  upgrade              Upgrade your copy of Flutter.

Project
  analyze             Analyze the project's Dart code.
  assemble            Assemble and build Flutter resources.
  build               Build an executable app or install bundle.
  clean               Delete the build/ and .dart_tool/ directories.
  create              Create a new Flutter project.
  drive              Run integration tests for the project on an attached device or emulator.
  format              Format one or more Dart files.
```

18.7 Special Terms for Pre-Release Materials. If so indicated in the description of the evaluation software, the Evaluation Software may contain Pre-Release Materials. Recipient hereby understands, acknowledges and agrees that: (i) Pre-Release Materials may not be fully tested and may contain bugs or errors; (ii) Pre-Release materials are not suitable for commercial release in their current state; (iii) regulatory approvals for Pre-Release Materials (such as UL or FCC) have not been obtained, and Pre-Release Materials may therefore not be certified for use in certain countries or environments or may not be suitable for certain applications and (iv) MIPS can provide no assurance that it will ever produce or make generally available a production version of the Pre-Release Materials. MIPS is not under any obligation to develop and/or release or offer for sale or license a final product based upon the Pre-Release Materials and may unilaterally elect to abandon the Pre-Release Materials or any such development platform at any time and without any obligation or liability whatsoever to recipient or any other person.

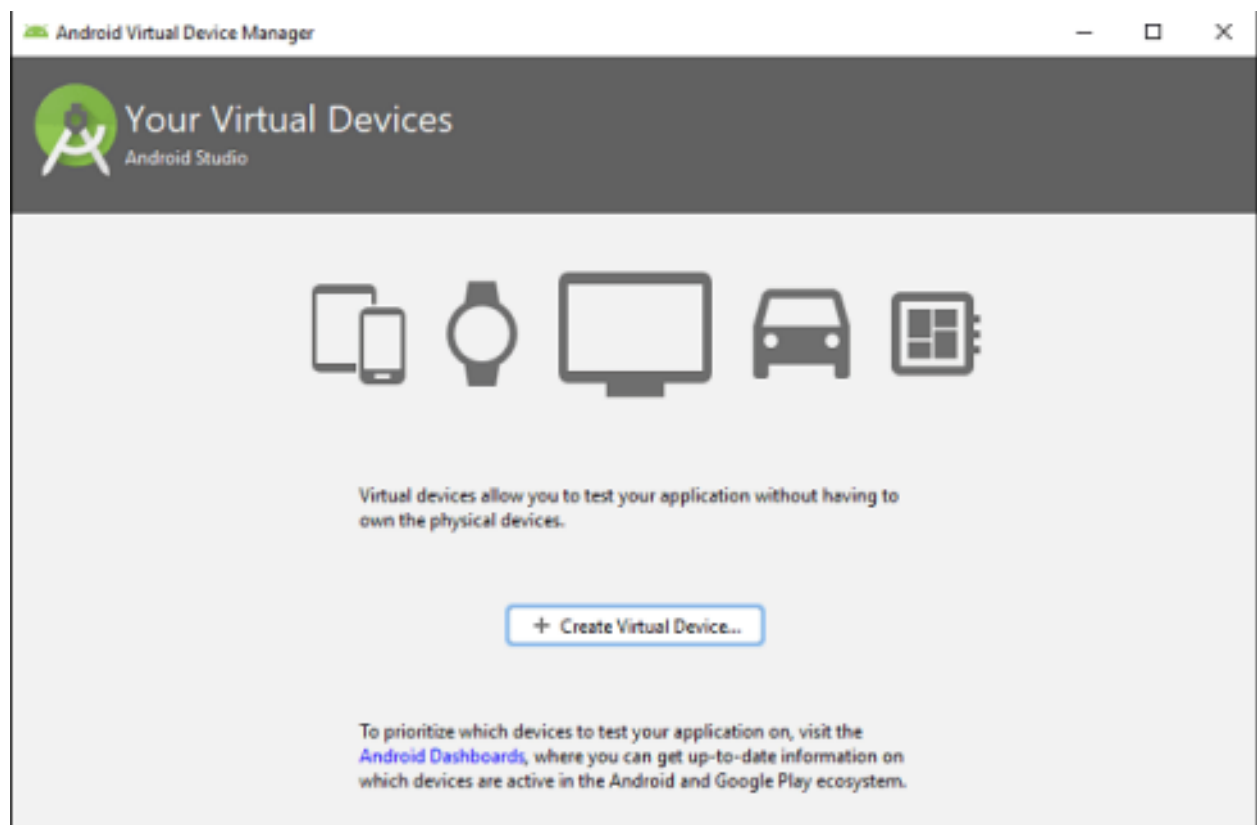

ANY PRE-RELEASE MATERIALS ARE NON-QUALIFIED AND, AS SUCH, ARE PROVIDED AS IS AND AS AVAILABLE, POSSIBLY WITH FLAWS, AND WITHOUT REPRESENTATION OR WARRANTY OF ANY KIND.

18.8 Open Source Software. In the event Open Source software is included with Evaluation Software, such Open Source software is licensed pursuant to the applicable Open Source software license agreement identified in the Open Source software comments in the applicable source code file(s) and/or file header as indicated in the toolchain or Software. Additional detail may be available (where applicable) in the accompanying on-line documentation. With respect to the Open Source software, nothing in this agreement limits any rights under, or grants rights that supersede, the terms of any applicable Open Source software license agreement.
